-  Waterproof: IP67
-  Two-Way Audio
-  Dimensions (mm): 64L X 45W X 19D
-  Accessories
-  Positioning Method: GPS + GNSS

Emergency Help at Your Fingertips

Safe Pro lets you call for help with the press of a button. It replaces makeshift check-in systems and mobile phones by delivering clear two-way audio, even in low signal environments thanks to its multi-network SIM card. It's easy to use, has an all-day battery life and can be combined with a number of accessories so it's easy to wear whichever way you want.

Easy to use

Balancing the need for discretion and ease of use, the Safe Pro's compact design and wearable accessories lets users keep the device close without getting in the way of the job at hand.

Flexibility to manage devices from anywhere, for anyone

Assigning a device to a user is critical within a lone working safety system. It ensures that responders will know which person needs help when an alarm is raised. We make it easy to assign devices either at your workstation or on the go with our Protector mobile app.

Simply use the app to scan the QR on the back of the device to assign it to your profile. This flexible system enables companies to share devices between workers, such as for different shifts.

Our lone worker device subscription includes the device hardware

In-Depth Feature View

-  **Fall Detection**
The fall detection feature of the device is crucial to catch slips, trips and falls.
-  **Discreet Activation**
Rather than making a sound, the device vibrates discreetly to let the user know that the alarm has been activated.
-  **All Day Battery**
With a 24 hour battery life, you can rest assured that your device will last even the longest day at work.
-  **Accessories**
Pick from a range of wearable accessories such as a belt clip, wrist strap, and vehicle or wall mounts.
-  **Roaming SIM**
The device uses a special multi-network SIM card to send location data and make voice calls.
-  **Low Battery Notification**
The device will vibrate when the battery drops below 20%. It will also continuously flash the battery indicator light so you know it's time to charge the device.
-  **Fast Charging**
The device comes with a charging dock that uses fast-charging technology to charge the device from 0-100% in just four hours.
